

**JESSIE PASTAN**  
QA ENGINEER

Queens, NY      631-482-0335  
[jessie.pastan@gmail.com](mailto:jessie.pastan@gmail.com)

**2+ years of extensive experience in manual QA**

- Strong hands-on experience in Web and Mobile-based applications testing with Planning, designing, building, maintaining, and executing tests, and test environments at each point of SDLC
- Developed test plans, test cases, and test suits using Mind Map.
- Performed functional, regression, usability, and system testing in an Agile/Scrum environment
- Performed cross-platform testing (iOS and Android) using Browerstack and TestFlight
- Executed REST API testing using Postman
- Perform data testing and validation by executing SQL queries on the test database
- Performed Compatibility Cross-platform, Cross-browser, and Cross-device testing
- Run Functional and non-Functional, Usability, Boundary, and Regression testing in order to test the stability and usability of a software application
- Performed in-depth exploratory testing of newly assigned features
- Tested mobile applications in both Native and Web environments and validated the mobile application functionality on virtual device emulators
- Created easily reproducible bug reports and tracked their status until satisfactory resolution.
- Ability to work effectively in a fast-changing working environment.
- Great interpersonal skills.
- Strong team player as well as able to work individually.

**Technical skills**

Platform:	Windows
Mobile platforms:	Android, iOS
Browsers:	Google Chrome, Mozilla Firefox, Safari
Testing Tools & Technologies:	Chrome dev tool, Charles Proxy, Xcode, Android Studio, ADB, Dbeaver, Postman
Bug tracking:	Jira
Test management:	TestRail

**Working experience**

**07/2020 – Present JPK Consulting | Queens, NY**

- Developing test cases against business requirements using **TestRail**

- Took part in creating **test documentation** from scratch (test plan, test suites, test cases, test coverage matrices)
- Performed **functional testing** of **web** application elements based on specific test data
- Run **GUI** testing to verify web application quality with regard to requirements
- Executed test Performed **Usability** testing to detect ergonomic and accessibility issues in the app
- Tested functionality using Chrome, Mozilla, Safari & Edge browsers to ensure cross-browser **compatibility** of the application
- Developed **SQL queries**/procedures for database and backend testing
- Executed REST API testing using **Postman**
- Performed comprehensive **regression testing** of new builds providing feedback to QA manager/ developers team
- Verified fixed bugs and provided feedback/statistics on weekly **Scrum** meetings
- Communicated with remote team using **Slack** messenger, Google meet
- Facilitated and maintained a collaboration environment for QA team through **Google cloud** services (Google Drive, Google Docs Suite)
- Prepared test environment by creating different user categories in the project database to check different user roles
- Reported bugs to **Jira** with further tracking and validation of files issued by developers
- Reviewed the **stories** and participated in Daily Scrum, Iteration Planning, and Release Planning meetings
- Interacted with developers, system engineers, and testing teams to identify applications defects
- Experienced in software design review meetings creating appropriate Test Plans
- Performed functional testing on **iOS/Android** devices and **Windows OS**

#### **2020-2021    Software Tester, uTest |**

- Performed functional testing with black box testing techniques
- Used different types of testing: Usability testing GUI testing, Adhoc testing, exploratory testing, localization testing
- Identified and reported software defects
- Executed test cases
- Performed cross-browser compatibility testing in Chrome, Firefox, Opera, and Safari

#### **Education**

**BS in Psychology**
