### Experience

07/2020 - Present JPK Consulting | Queens, NY

- Work with the development team to assure high quality of software products in SDLC
- Contributing ideas for new features and identifying areas for improvement proactively
- Strong hands-on experience in Web and Mobile-based applications testing
- Developed test plans, test cases, and test suites using Mind Map.
- Performed functional, regression, and usability testing in an Agile/Scrum environment
- Executed REST API testing
- Achieved data testing and validation by executing SQL queries on the test database
- Completed Compatibility Cross-platform, Cross-browser, and Cross-device testing
- Conducted in-depth exploratory testing of newly assigned features
- Tested mobile applications in both Native and Web environments and validated the mobile application functionality on virtual device emulators

- Established easily reproducible bug reports and tracked their status until a satisfactory resolution
- Ability to work effectively in an Agile environment
- Great interpersonal skills
- Motivated to work as part of the team or as an individual contributor

**2020–2021    Software Tester, uTest |**

- Performed beta testing for software builds
- Experienced Functional testing with black box testing techniques
- Used different types of testing: Usability testing, GUI testing, Adhoc testing, exploratory testing, localization testing
- Identified and reported software defects
- Executed test cases
- Conducting cross-browser mobile testing and compatibility testing
